The Brain - Audit Test Document

Author: Dr. Ada Lovelace

Topic: Artificial Intelligence and Knowledge Graphs

Section 1: Introduction

The Brain is an AI-powered knowledge management system.

It uses LightRAG and Neo4j to build knowledge graphs from documents.

Users can upload PDFs and query the knowledge graph using natural language.

Section 2: Technology Stack

Backend: FastAPI, Python 3.11, LightRAG, RAG-Anything, MinerU 4.0

Database: Neo4j Community 5.26 with APOC plugin

LLM: Ollama with qwen2.5:3b model

Embeddings: nomic-embed-text with 768 dimensions

Section 3: Conclusion

The Brain provides a seamless interface for document-based AI querying.
